

Rishika Jain

+91-7014469514 | rishikajainmini@gmail.com | [LinkedIn](#) | [GitHub](#)

Software Developer with more than three years of experience in low-latency trading systems, scalable backend architectures, and data-driven platforms across Goldman Sachs, Apple, Paylocity and NUS. Strong Computer Science foundation from BITS Pilani with expertise in C++/Java. Recognized for academic excellence and leadership.

Education

Birla Institute of Technology and Science, Pilani Campus

Pilani, India

Bachelor of Engineering in Computer Science, M.Sc.in Biological Sciences (CGPA-8.72)

Aug. 2018 – May 2023

Jayshree Periwal High School

Jaipur, India

Class 12th (Percentage - 94.4%)

March 2017 – March 2018

Experience

Airbase Paylocity

Remote, India

Senior Software Developer, Bank Payments

June 2026 - current

- Built and enhanced scalable **Python/Django** money-movement services supporting **50K+** companies across ACH, checks, international transfers, and virtual cards; improved critical **API performance** by **35%** while meeting **99.9% SLOs**.
- Shipped a **batch payment flow** consolidating multiple payments into a **single bank entry**, reducing overhead by **30%**.
- Led production debugging using **Datadog**, **Metabase**, and **MCPs**, resolving payment issues and improving **reliability**.

Goldman Sachs Pvt. Ltd.

Bangalore, India

Senior Software Developer, Global Banking & Markets

June 2023 - May 2026

- Improved functionality of a **Stock** research and execution platform using **C++** and **Python** to develop, test, and deploy **algorithmic trading strategies**, increasing execution speed and adaptability to changing market conditions.
- Architected and executed a new high-impact **ETF** trading product using **Java**, **Kafka** and internal proprietary language resulting in a **7% improvement in trade hit ratio** and a significant **P&L gain** within the first year of deployment.
- Spearheaded the development of new features and enhanced the **architecture** of a quoting application using **Java** and **Scala** achieved a **reduction of 2 ms** in **real-time trading execution latency**, while extensively debugging and monitoring production workflows in **Linux** environments.

APPLE India Pvt. Ltd.

Bangalore, India

Software Developer, Apple Care (Internship)

Jan 2023 - June 2023

- Engineered and implemented a **scalable AWS** infrastructure that can handle **over 1 lakh** queries efficiently and storing and managing data retrieved from **Search Engine Results Page API** leveraging **DynamoDB**, **Lambda**, **S3** and **Golang**.
- Developed **real-time analytics dashboard** using **Tableau** for strategic SERP analysis, key competitor identification, content optimization to **improve the visibility** of Apple assets on search platforms.
- Provided the foundation by building the PoC for their upcoming project by comparing **graph databases** such as **Dgraph**, **TigerGraph**, and **AWS Neptune** and conducting in-depth research.

National University of Singapore (NUS)

Singapore

Research Associate, NUS AESB Lab (Internship)

Sept 2022 - Dec 2022

- Employed **Graph Theory** and **Network Analytics** using **Python**, **R** and **Cytoscape** to build and analyze microbial interaction networks, successfully identifying keystone growth-enhancing Plant Bacteria within a bacterial cluster.
- Identified key growth-enhancing Plant Bacteria advanced to the **testing phase** in wet labs for strategic implementation in agricultural and environmental interventions.

Projects

NCPOR, National Centre for Polar and Ocean Research

May 2020 - Nov 2020

- Developed a **deep learning model** for the **future prediction** of snowstorms which achieved accuracy of **94.6% accuracy**.
- Used NumPy, Keras, TensorFlow, Pandas and, Matplotlib **Python** libraries to extract patterns in Jupyter Notebook.

Twigg | [Website](#)

Jan 2021 – May 2021

- **Ideated and developed** a **website Twigg** helping students make well-informed career decisions.
- Developed **UI** of the website using **Figma**, conducted **100+ informative interviews** and collaborated with organizations.

Technical Skills and Courses

Languages: C/C++, Java, Python, Go (Golang), SQL, Scala, JavaScript, Linux

Frameworks: Django, React.js, AWS Cloud, IntelliJ IDEA, Claude Code, GitHub Copilot

Technologies: Postman, Git, VS Code, MATLAB, Jupyter Notebook, Figma, Tableau, Jira, Datadog, Metabase, FullStory

Courses: Data Structures And Algorithms, Object-oriented programming, Operating System, Probability and Statistics, C Programming, Database Management Systems

Honors

Captain of BITS Pilani Girls Athletics Team: Led a team of **22** athletes winning numerous awards.

BITS Merit Scholar: Awarded for academic excellence for **9 consecutive semesters**.

NASA Human Exploration Rover Challenge '21, USA: Secured **10th place** among **71 international teams**.

Manipal MedTech Hackathon '21: Secured **1st place** for a novel solution to cure Ca-UTI.

NTSE Scholar: Ranked in the **top 1 percentile** nationally (2016).
